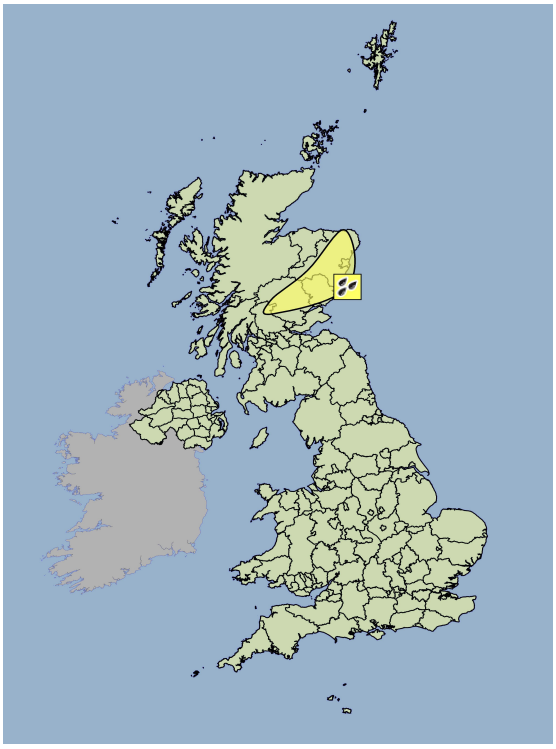
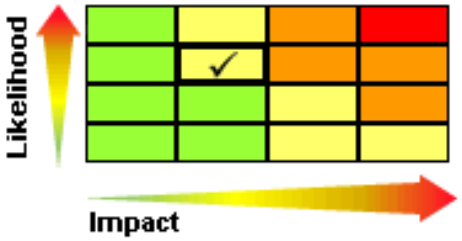
National Severe Weather Warning Service





Chief Forecasters Assessment
Frontal rain will become slow moving over parts of Perth and Kinross and Angus during Monday through till Wednesday, waxing and waning in intensity. This will primarily fall as snow above 400-500 m but may still give rainfall totals of over 20 mm at lower levels each day. With saturated ground and rivers already high in these areas there is the risk of some localised flooding.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **13:00 on Mon, 27th Jan 2014** until **15:00 on Wed, 29th Jan 2014**

A band of rain and hill snow will become slow moving across Tayside and Northeast Scotland on Monday and persist there through into Wednesday. This rain will fall onto already saturated ground.

The public should be aware of the potential for localised disruption due to flooding.
